

Hello,

I have been a subscriber to Satellite radio since the day it has come onto the market. There is NOTHING like it provided by any local radio broadcast stations. Every morning, I get into my car, put on channel 212 (philly traffic) and literally plan my route to work within a two minute period. I could NEVER get this from local stations! I have to wait 10-20 minutes for traffic updates and I have been caught in HOURS of traffic jams because of the poor quality of programming from local radio stations! My commute to work has gone down from an hour to less than 30 minutes EVERY DAY CONSISTENTLY DUE to XM RADIO! Please let them continue to do business the way they currently are performing. They provide excellent reception, GREAT SERVICE I CANNOT GET ANYWHERE ELSE and give me a less stressful life!

Please REJECT NAB's petition 04-160, they just don't provide customers with enough choices and are upset at competition that DOES provide us customers with solutions to our needs!
